

OpenPEPPOL

PrACC Activities in scope

Isabella Rapisarda PRACC Leader

PRACC Evolving Scenario for Community

○ **50 Members**

○ **New members to
join from eSENS
eTendering pilot**

Strategic Goals

- To support the efficient implementation of the full spectrum of innovative changes required by the Directive 2014/24/EC on public markets.
- To complement the portfolio of components for Member states through PEPPOL suite in the tendering process area
- To ensure interoperability between systems in order to exchange messages and documents, e.g. or tenders in the eSENS project;
- Run in day to day operations and governance the OpenPEPPOL network for eTendering usage

PRACC's scope by the SENS uptake

- ▶▶ Take over the e-SENS eTendering specifications and artefacts by end of the e-SENS project
- ▶▶ Provide a forum for the eTendering Community in the OpenPEPPOL Pre-Award Community
- ▶▶ Support the Domain in establishing interim as well as long term solutions on open issues, such as (but not limited to); Trust model, Governance structure, Agreement framework, etc.
- ▶▶ Support the Domain in establishing eTendering contract documents, initially as interim contracts while the OpenPEPPOL contract framework is being adjusted to cater directly for legal requirements in the new domain
- ▶▶ Long term goal is to align PreAward and PostAward Agreements, sustainability and operation.

eTendering Transition-In Work Group Mandate

- The e-Tendering Transition-IN project serves the purpose of defining and implementing an AS-IS production setup of the e-Tendering Process area.
- At the end of WG Activities, the implemented e- Tendering profiles will be sustained and further developed according to normal procedures in OpenPEPPOL AISBL;

Pre Award Catalogue Mandate completed

- PEPPOL BIS for pre-award catalogue will be used in choreography submitting a tender using PEPPOL BIS 54 Tendering together with trdm 090 and as confirmation trdm 045.
- At a later stage will also ESPD response be part of the choreography and other structured transactions.

ESPD/VCD: Mandate to Assign in the future

- ▶ **Norway (DIFI) created a version 1.0.2** including all artefacts that secure the quality, and two different format for Espd and VCD and offered to OpenPEPPOL, that accepted as PEPPOL BIS ESPD 1.0 meaning that is ready for review.

ESPDint project with DG GROW

Currently under discussion in the ESPDint project, which is responsible for the Change Management. OpenPEPPOL intends to develop a BIS version 2.0 (and migrate to this version) when a stable version of the Standard will be available.
