Bologna, May 05<sup>th</sup>, 2021

Dear Madame, Dear Sir,

I am extremely interested in applying for your next call as PoAC CMB Member.

My name is Elisa Bertocchi, I have been working in Intercent-ER, the Regional Agency for the development of electronic markets (Emilia-Romagna, Italy) since 2017, currently holding the role of Information Systems Administrator. Since I joined the Agency, I contributed firmly to the successful implementation/adoption of Peppol's infrastructure and Peppol BIS documents as a standard to support public procurement and e-Delivery. Currently, the documents manageable by our platforms are Order Only, Ordering, Order Agreement, Despatch Advice, Billing and Credit Note.

During this period, Intercent-ER had the chance to collaborate directly with the Italian Peppol Authority AgID, via an agreement, to promote and bring the Peppol ecosystem at a national level. After a great start at regional level, in fact, Peppol became also the nationwide standard for the electronic orders of Health Care Public Administrations in February 2020, counting more than 3 millions of orders transmitted over the Peppol network as of today, with the ambition of growing in other sectors and increasing the numbers of Peppol BIS documents supported.

I am a highly motivated and determined to keep contributing to the evolution of the Post-Award Community, where I held the position as CMB member for the last two years, offering my 5+ years of expertise and studying of the Peppol procedures and technical infrastructure. Going in depth, I had the privilege of being an active member of several workgroups (such as "CEN/TC 440 - Electronic Public Procurement", "CEN/TC 434 - Electronic Invoicing" and "UNINFO UNI/CT 522 eBusiness and Financial Services Commission"), being involved in the implementation of 2 projects co-funded by the European Commission through the CEF (named "eIGOR - eInvoicing GO Regional" and "EeISI -European eInvoicing Standard in Italy") and finally collaborating daily with Service Providers and final users.

Thank you for the care you are dedicating to my application.

Most sincerely,

Elisa Bertocchi
