Experience

Senior Product Architect

Basware

Jan 2010 - Present (12 years 3 months +)

Responsible for Architecture and Design of Basware products ("BaswareOne", "Basware Transaction"), Solutions ("Signing, Timestamping") and Integration ("Peppol" and "India E-Invoicing")

Oxalis Community Technical Consultant

NorStella

Jan 2021 - Present (1 year 3 months +)

Oxalis is the leading open-source software implementation supporting the provision of Peppol eDelivery specifications for the Peppol network.

Peppol compliance will be the core focus for the maintenance and further development of the software components. The Oxalis basis software and AS4 plug-in are maintained proactively to ensure that they continue to be Peppol compliant.

The Oxalis Management Team Member

Oxalis Network

Mar 2021 - Present (1 year 1 month +)

Oxalis is the leading open-source software implementation in OpenPeppol supporting the provision of Peppol eDelivery Services (AS4) for the Peppol network

Oxalis Community is a not-for-profit organization organized under NorStella Foundation based in Norway, dedicated to the continued support and development of Oxalis, to secure Peppol compliance and value for its users.

Oxalis Community is facilitated by the foundation NorStella. It is organized according to democratic non-for-profit principles and established as an independent and autonomous part of the NorStella association with independent budgets.

The goals of Oxalis Community:

- * Secure sustainability and managed development of the Oxalis software
- * Encourage continued implementation of eProcurement using Peppol specifications.
- * Support innovative Peppol-based services that promotes the goal of harmonized and interoperable processes.

Senior Software Consultant / Software Developer - Team Leader Role

Seasia Consulting

Aug 2007 - Dec 2009 (2 years 5 months)

I joined Seasia Consulting as a team lead in august 2007. Seasia Consulting is Offshore Development Partner of HP- Hewlett & Packard. My role is to lead the team of software professionals to develop and maintain public retirement solution using JClarety (ClaretyTM) for USA Government.

In addition, I also lead couple of teams involve in developing proof of concept, technology demonstration, and in-house product development.

I involved in quality improvement process like CMMi. I was also part of team responsible for Information Security (ISO 27001). I involved in preparing and maintaining Risk Assessment and Treatment (RAT) and Business Continuity Plan (BCP).

Tech Lead

Voltix

Apr 2005 - Aug 2007 (2 years 5 months)

Being part of Enterprise Search Product Development Team, we delivered solution to Barclay Bank (UK), BEA (USA). We also developed our in-house open source P2P Enterprise Search Product - Kshoni.

In addition to this, we provided web solution to number of Australian Client (Schools, Government, Milk-Product Company) through our Australian subsidiary IPP-Consulting.

My Role was to design and prepare architecture of application. As a Tech Lead, I was responsible for handling and solve all technical issues in Indian Branch.
