Vision for Member Position of eDelivery Community, Change Management Board (eDEC CMB)

As a “Subject Matter Expert” & “Technical Expert” who is deeply associated with Peppol since pilot phase, one who is involved in creating & implementing technical specification with-in and outside Basware, I think I can add value to eDelivery Community, Change Management Board (eDEC CMB).

As a eDEC CMB member I want to trigger and work closely with other Members of Community to adapt & extend Peppol as per growing markets needs in term of compliance, specifications, standards, norms, and adoptability. We will also make sure that proper feedback & communication channel and proper release mechanism will be established between Service Providers, Access Points Providers, SMP and Access Points software implementor and so on.

Brief Background/Introduction

My name is Arun Kumar and I working as a Senior Product Architect in Basware. I have more than 21 years of experience in ICT field. I joined Basware in 2010 and associated with Peppol since then.

- In 2010, got associated with Peppol Pilot project and setup basic infrastructure in Basware for pilot testing
- In 2012, lead the development of Basware Access Point and SMP implementation.
- From 2012 to 2020, contributed to number of OpenPeppol “Technical Working Groups”, “Interoperability Groups” and “Forums”. Meanwhile scaled and expanded Basware Peppol infrastructure and supported the transition/migration from START to AS2 to AS4 in addition to integration & development related to different Countries profiles.
- In 2020, helped setting up Oxalis Community to continue support Open-Source implementation with-in Peppol Network
- In 2021, elected as Member of the Oxalis Management Team for 2 years Term
- In 2021, started contributing to Oxalis as “Oxalis Community Technical Resource”
- In 2021, started contributing as a Member of Technical sub-committees of Business Payment Coalition, USA’s E-invoice Exchange Framework Market Pilot".
- *Since November 2021, accepted the role of “Member eDEC CMB” as a replacement and already contributing to some key topics and will continue doing so after successfully getting elected as a member, eDEC CMB.*
