Education

Norwegian University of Life Science, Ås, Norway Master's degree in Entrepreneurship and Innovation. Graduated June 2017.

Rice University, Houston, USA Completed «The Norwegian School of Entrepreneurship» as part of my master's degree. The stay consisted of a three-month internship plus evening classes. Graduated May 2016.

Østfold University College, Fredrikstad, Norway Bachelor's degree in Innovation and Project management. Graduated June 2015.

Queensland University of Technology, Brisbane, Australia 5th semester of my bachelor's degree. Graduated November 2014.

Work experience

Logiq AS, Halden, Norway

Project Manager, May 2020 – present time

Project Coordinator, January 2018 – May 2020

- Carrying out various EDI-related projects, including customer guidance, planning, testing and follow-up.
- Holds the overall responsibility and expertise on Peppol at Logiq, which includes keeping up with news and updates, analyzing its impact on our customers and internal systems, and take charge of internal update- and expansion processes in this regard.
- Initiated and still hosting Logiq's internal Peppol-forum which aims to enlighten my coworkers on news regarding Peppol, discuss eventual Peppol-related issues and plan for future expansions and updates.
- Worked with the Swedish organization BEAst and its Norwegian sister organization Virke and created three different versions of a series of XML-formats called the BEAst-standard used in the builders- and construction industry.

Nilsen Sport and Electronics, Ørje, Norway

Store employee, June 2009 – December 2017

- Sales of sports equipment and electrical appliances.

Kjeller Innovation, Lillestrøm, Norway

Internship, September – December 2016

- Team member on DonDetox commercialization project.
- Responsible for mapping regulatory requirements and the application process for approval of additives in animal feed in the EU and USA.
- Responsible for market- and competition analysis.

GoCo.io, Houston, USA

Internship, March – May 2016

- Telemarketing a HR-software in a B2B market.
- Developed a marketing plan and worked with online marketing.
- Researching potential investors and prepared presentations for upcoming investor meetings.
- Organized the accounts and produced financial reports.

Fresenius Kabi, Halden, Norway

Completed my bachelor thesis on «Lean manufacturing», January - June 2015

- Carried out a highly detailed "Value stream mapping" for the production of a specific product.
- Planned a "Kanban" system to shorten the production time for this product.
- Planned and implemented some actions which brought production closer to our recommended "Future state map".
- The thesis has subsequently been used in the teaching of new bachelor students and as a star example to companies to show what they can get out of a collaboration with students.

OTHER ACTIVITIES AND EXPERIENCES

- Mentor for a group of 1st year students in the master's program Entrepreneurship and Innovation, and in this connection completed a mentor course.
- Various positions and voluntary work related to the universities and student organizations.
- Various positions and volunteer work related to local sports clubs, events and youth clubs.
