Summary

Self-motivation and cheerful person with 14+ years of experience in E-procurement, E-invoicing, and Peppol across the globe.

Experience

Senior Product Manager

Basware

Oct 2021 - Present (6 months +)

Electronic invoicing is no longer a trend – it's the norm. With the spread of e-invoicing surging across the globe, with it comes a myriad of laws, mandates, and new electronic invoicing (e-invoicing) compliance requirements. When ensuring globally compliant B2B & B2G connectivity, e-invoicing through Peppol is quickly becoming a central business requirement. Read on to learn what Peppol is, and how the Basware Network helps to connect to Peppol.

Across the globe, countries are turning more and more towards e-invoicing. Why? Because the benefits speak for themselves. E-invoicing drastically reduces the cost of processing an invoice, decreases the likelihood of invoice disputes, eliminates manual entry errors, increases global tax compliance overall, reduces the reliance on paper processing, and therefore, creates a greener more sustainable workplace.
