| 10 | Australia | 37 | 38 | 1 | 2,70% |

MC decision on semantic versioning

1. The applicability of the Semantic Versioning Annex to the Internal Regulations is suspended until further notice
2. PoAC and SPC will cooperate to initiate a workgroup that will discuss the relevant topics in more detail. The mandate for this WG will be agreed at the Coordinating Committee
3. Any requirements for changes to the IR resulting from this work will be submitted to the APP CMB for consideration and approval.

Market News

- EESPA GAM has approved an incubation project with Peppol

Peppol Service Provider survey

Peppol Authority Specific requirements – MC decision

Decision to approve PASR

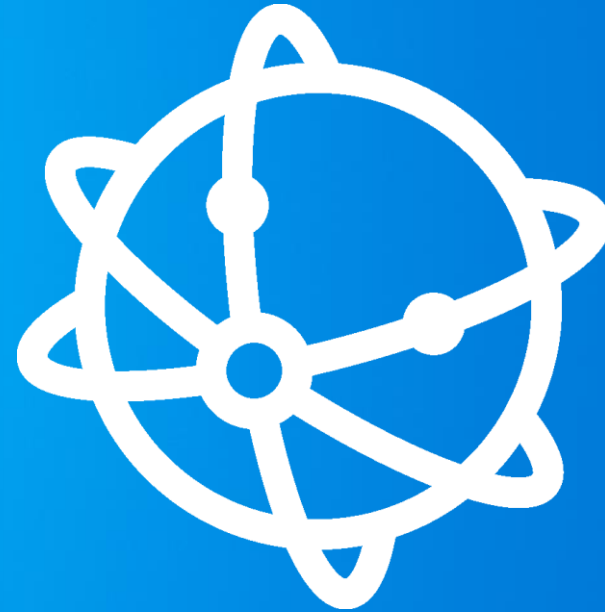

- a. All Peppol Authorities Specific Requirements from Australia, Belgium, Germany, Iceland, Italy, Japan, New Zealand, the Netherlands, Norway, Poland, and Singapore are hereby approved, with some exception
- b. Some exceptions mainly related to postponing certain requirements.
- c. As part of this decision, the MC agreed on certain guidelines that should be considered by Peppol Authorities

Exceptions

- a. Mandatory Use of the Peppol Directory (Australia, Germany, New Zealand, Netherlands, Italy, Belgium):
- b. Mandatory use of the Message Level Response (Germany, Netherlands):
- c. End-to end security (encryption, authentication) in the Post-award Service Domain (Netherlands):
- d. Data Quality in the Post-award Service Domain (Netherlands):
- e. Mandatory use of the AS4 transmission protocol (Netherlands):

Recommendations

- a. Guidance: (separate the actual rule, from guidance). Ideally different documents
- b. Identifiers: PA should make all reasonable efforts to support market requirements expressed by Service Providers, such as the registration on lower-level units
- c. Centralized SMPs: Always guideline how to use centralized SMP particularly when Service Providers are based outside their jurisdiction.
- d. Reporting: Prior central reporting, PA should ideally not to extend these schemes to Service Provider that have not been reporting to them under the TIA framework.
- e. Security Peppol Authorities should refrain from introducing through PASR new security requirements from what go beyond what they have today.
- f. Accreditation Policies: Accreditation Policies should be used to ensure compliance with their other PASR and not to introduce new PASR through Accreditation (In particular, certain business requirements).
- g. Local interoperability specifications: In case Peppol Authorities introduce local interoperability specifications then this should be applied only to Service Providers that offer relevant services.

THANK YOU!
