memo

Notification of candidacy

Dear members of the Election Committee,

By this letter, I would like to put myself forward as a candidate at the upcoming election for the PAC Community Leader. The Netherlands Peppol Authority, for which I am working as a Coordinator, is supporting my candidacy for this position.

The position I would like to stand for:

PACL: Peppol Authority Community Leader

Motivation on the position

Peppol Authority Community Leader

The past year I took on the role of Peppol Authority Community leader. In this role I try to build a closer collaboration between the PA's and between the different communities within Peppol.

With my renewed candidacy I would like to continue this work. We have worked on many different topics the last year with the PAC. The roll out of the new agreement framework, incubation of EESPA, start of revision of statutes, overall security with Peppol, are a couple of things that asked for diplomacy and especially keeping everyone on board. From my point of view, it is important to keep all PAC members informed and connected to the different subjects and keep the conversation (sometimes discussion) going.

EESPA, statutes, security, and core services of Peppol are also on the agenda for the near future. Next to that the PAC needs to play its role within new domains like Logistics and CTCC that are of great importance for Peppol. But these topics are not always on the radar of the PA's. So here is why we need to keep the PAC roundtable the place to inform and freely discuss amongst the PA's and keep them connected to the ongoing matters. This is where I want to play an active role and help guide the PA's through these interesting subjects.

Date
6 May 2021

Furthermore, I want to keep the roundtables as interactive and accessible as possible. It must be a real community meeting which means many voices must be heard. I will do my utmost to make this possible.

But next to that I will also continue to engage bilateral contacts with the other PA's and other communities. If needed I will be the voice of the PA's within Peppol.

To mention one other main thing is the strategy of Peppol. My conclusion is that I would like to continue my role PACL and contribute in this way to the future of Peppol. I am looking forward to helping the PA community (and Peppol) with its continuing growth and ambitions.

This is my motivation for the role of PACL. If you have any questions do not hesitate to contact me:
