In or Out

Peppol

What is missed or seen as an issue

- More on SP related strategy items (coming up, changes planned well ahead)
- More in-depth National/Regional sessions
- Having an off-line discussion area
- Too many acronyms (still repeating from Y2022).

What is appreciated

- Meetings are well managed (posted and recorded immediately, well monitored timewise, well chaired, topics covered by experts, balanced agenda)
- Content of the meeting (MC news, release news, feedback on important items, well prepared information, well balanced technical and business topics)
- Environment of the meetings (friendly environment and positive attitude, openness, questions welcome)

Activities for your attention

- GA17 elections ongoing
  - Election of eDec CMB member
  - Election of PoAcc CMB member
  - Election of SP representative to Agreements, Policies and Procedures CMB

- SPC representatives to Security Committee
  - Rick Harvey (Layer Security)
  - Arun Kumar (Basware)
  - Stefan Riesenbeck (OpusCapita)
  - Christer Wejke (Pagero)

- SPC representative to GENA incubation Committee

- Critical infrastructure workgroup

3. Update from eDec

eDEC Information

SMP 2.0 Work Group

- Internal eDEC CMB preparations went well so far
- Call for Participation will be sent out to PAs and SPs asap
- Should form the technical basis for the Critical Infrastructure WG
- Kick-off meeting is envisioned to be on Wed April 3rd, 8:30 to 10:00 CET
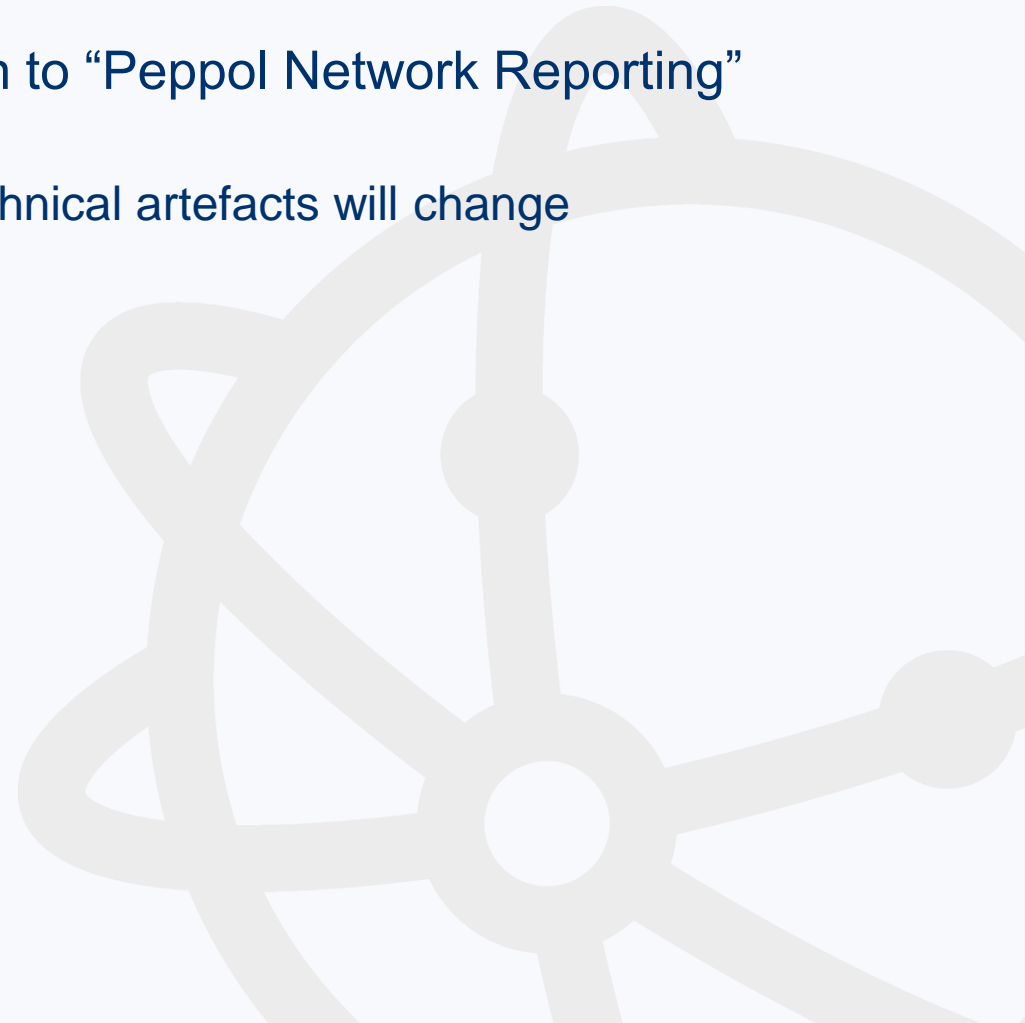

eDEC Information

Other News plan

- Planned to rename the "Peppol Reporting" specification to "Peppol Network Reporting"
  - Clearly differentiate from "Tax Reporting" and similar
  - Will just be a change in the title and the wording – no technical artefacts will change
  - Will be adopted soon
- eDEC Code Lists v8.8 are to be released soon
  - Including Malaysia PINT IDs and others

4. News from Post Award Committee and EN standardization Technical Committee 434

GENA Incubation Committee

Status

- In 2023, the joint incubation project with EESPA (which transformed into GENA) was approved, and started making progress. In 2024, the first results will become available, and the eventual conclusion will start to come in sight.

- The technical specifications of a Starting Environment will be concluded in the early part of 2024 and the possibility that the incubation project can go into production in 2Q2024 remains desirable and feasible.

- The outline of an organisational and governance model of closer cooperation between OpenPeppol and GENA, linked to a successful conclusion of the incubation project, will be available in spring 2024 and will be discussed with OpenPeppol Members

- The Incubation Monitoring Committee will be activated there is progress to review – the SPC should appoint at least onenew representative to replace Trond.

Closer cooperation – OpenPeppol and GENA

Outline of an organisational and governance model – workshop meetings

- What is needed to make Peppol organisationally and operationally robust and focused enough to become THE platform to support a "global invoicing highway"?
  - Finance
  - Infrastructure
  - People

- New Service Domain vs changes to the Post-award Domain

- The role of the OpenPeppol Service Provider Community

Further meetings needed – results expected before summer 2024
