Business Message envelope 1.2

The PEPPOL Message Envelope is a customization of the UN/CEFACT Standard Business Document Header 3 (SBDH) [SBDH]. Version 1.2 of the SDBH was needed in order to Enable non-xml payloads such as

- Base64 binary payloads (e.g. encrypted payload like Tender)
- Text based but non XML-formatted payloads like EDIFACT

The specification was released to production on February 5th and can be located at
