

Motivational letter

By Isabella Rapisarda

Dear OpenPeppol Members,

I would like to announce my candidacy for the Pre Award Community Coordination lead.

As Procurement person for almost 20 years, and OpenPeppol member since 2012 I consider myself very fortunate to have seen the Association's growth and in being part of the Pre Award community's development from the early beginning.

This is my fourth time running for the position, and now more than ever is time to tackle progressive action for ensuring Pre-award becomes steadily attractive to service providers, able to offer solutions to Public Sector in eTendering documentations exchange, standing out as a best practice for interoperability.

Therefore in my vision, it is of the utmost importance that Pre award Peppol Bis specs are developed and maintained according to ESPD's recent trends, by setting up a new workgroup for Espd 3.0 and by keeping the Community's door open to the new eTendering profiles / transactions required by the users.

I always believed and acted with sincere conviction that we all need a strong, coherent, collaboration with other Communities and the Managing Committee, to achieve both our Community and the Association goals, and it will remain my commitment in case of a new mandate.

I really hope to receive your support for making the Pre award community stronger and more inclusive,

Sincerely yours,

Isabella Rapisarda
