OPENPEPPOL

28.02.2020

Dear OpenPEPPOL,

I would like to announce my continued interest and availability in the position of member of Change Management Board of eDelivery Community.

I have been member of the eDelivery CMB for past 2 years and followed Peppol:s development since 2011 when I built Visma:s accesspoint and would like to continue to advance this great project to fulfill its role in the global electronic document delivery field.

Being employed in the largest Peppol accesspoint in Norway I have been on the front seat to see the development and issues in the network on the ground level and last 2 years on the board has shown me the work that happens behind the scenes so I feel I would be good asset to Peppol community also in the future as the network grows to new areas.

Sincerely,
Risto Collanus
