

# Candidate

## eDelivery Change Management Board members

Espen Kørre, Norwegian Digitalisation Agency, Norway

<https://www.linkedin.com/in/ekorra/>

### Motivation

As the architect for some of DigDir's national solutions, one of which is PEPPOL, I'm involved in both technical and architectural aspects of PEPPOL implantation in Norway, as well as national electronic messaging and rollout of PEPPOL into other domains, such as eGovernment. Due to my technical knowhow, practical experience and strategic role as architect I will be able to give valuable input to the eDelivery CMB and to better align Norwegian solutions with PEPPOL specifications.

My main goal will be to ensure that the CMB holds a strategic and innovative direction in their decision making, ensuring transparency and predictability. I will also work actively in clarifying the division between the actual changes handled in the workgroups and strategic role of the CMB.

### CV

**Technical expert and architect**, Espen, has long experience from Norway's work with eGovernment services, both as a developer and last 5 years as architect. He has been in charge of the team working on Oxalis and ELMA (the Norwegian SMP), involved in the National Norwegian eDelivery strategy and the current work of migrating the PEPPOL network to AS4.
